

2022-2023

Physiotherapy

Bachelor

The program of the first cycle studies, Bachelor in "Physiotherapy" aims to prepare professionals in the rehabilitation field, which will offer professional services in individuals and in the community. The professionals formed by this study program will be capable of practicing their profession in macro, micro and meso levels, serving persons, families, groups and communities.

The design of the study program is based on the law of higher education, the law of the regulated professions and the experience of international physiotherapy study programs. The Bachelor in "Physiotherapy" aims to prepare students with all the informations, skills and techniques necessary to offer a wide range of services for different health problems and also a variety of techniques for different groups of patients.

The development of skills and professional competencies is realized combining basic multidisciplinary theory, the technical preparation through a group of modules of specific techniques of physiotherapy and also through practice on hospitals and clinics, which are UniBa's partners.

Study program duration

- ✓ Full time studies
- ✓ Normal duration: 3 academic years
- ✓ Maximal duration: 6 academic years
